Planning notes

The door panel surface of the appliance extends 40 mm from the furniture cavity.

The outer edge of the door handle extends 90 mm from the furniture cavity.

For installation underneath cooktops: distance between the underside of the cooktop and the top edge of the oven housing: min. 15 mm. The planning notes for the cooktops (particularly regarding ventilation, gas/electric connection) must be taken into account.

To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the corner of the housing.

The mains socket needs to be planned outside the built-in niche.

The LAN port can be found at the back on the upper left side.

Connection

Total connected load 5.4 KW.
